Diagnosis:

This patient's death is expected within the next few days and the team who usually look after him or her have decided to place him or her on the Last Days of Life pathway.

It has been agreed that this patient should receive symptomatic care only and transfer or admission should only be considered in the most exceptional circumstances. Resuscitation would also be inappropriate.

The patient (where appropriate) and family are fully aware of this decision.*

☐

he/she has been written up for parenteral opiate analgesia, anti-emetic, drugs for restlessness and agitation, and medication for excessive secretions.*

☐

In the case of death the ward nurses would be able to verify the need death without for a doctor to visit.*
